## FLORA BOWDEN QUEEN

Nineteen year old Flora was last night crowned Queen of the Macdonald Winter Carnival. She was born and raised in N.D.G., Montreal. She sang with the McGill Choral Society last year and earned her college fees by singing with a band touring hotels in the Eastern Townships, and by modelling sweaters. Flora is enrolled in the Kindergarten course, has represented Mac in Basketball and is the leading lady in the Green and Gold. Her campaign manager was Scottie Gardiner and the other candidates in the election were Frieda Vivian and Pat Orser.

### LEADING THE BLIND

As our technical discoveries and population increase, the need for capable leaders of our civilization increases also. It has been said, "The masses do not accomplish much... they follow the lead of exceptional men". What characterizes these men? What blueprints can be given with which we might compare ourselves?

Lack of decision is a point that is always noted, and I will not dwell on it. Leaders are characterized by their ideals, their visions of what might be; and the high standards set to achieve their purpose. Decisions must be backed by self confidence and courage. These two factors I wish to summarize by the word ambition, which should stand out as the most important factor, for this surely makes a man stand apart from his contemporaries. Without ambition the whole world would come to a standstill. It is able to nullify many faults in a person. But a leader must be reliable, must have self discipline and responsibility.

From childhood we can choose to obey or disobey rules and laws . Irresponsibility means either obeying blindly, as an animal, or refusing or neglecting to obey them, as a fool. It is the duty of our educators to guide us towards this type of responsibility and towards a proper sense of values. This comes by example and not without discipline. Self discipline can only be achieved after the art of obeying has been learned. A philosopher advises all of us to do something occasionally for no other reason than that we would rather not do it.

A leader must be able to cultivate people. He must know and understand them. He must be the opposite of the tyrant who enforces severe discipline merely because he knows no other way. We can learn to appreciate people by travel, by working beside all types of people, and by taking an active part in extracurricular organizations here.

J.W.K.

### MACDONALD CURLING CLUB

Much spade work was done by R.D. Hamilton before his election as president in December of 1957. At that time he reported that out of the \$1200. donated from the Stewart Fund \$1000. would be spent on 2 sets of granites. These rocks have now arrived from Scotland and are ready for use. Every Sunday from 10 a.m. to 3 p.m. the club curls at the Glenfinnan rink. While membership stands at nearly 50 there is still room for more students. For the first time a Winter Carnival Bonspiel will be held on Sun. Jan. 26 at 2 p.m. Five rinks of Mac students and one composed of faculty members will compete. Decide now to attend. C.C.

### EXAM RESULTS (JANUARY)

	<u>1957</u>			<u>1958</u>		
	<u>No. in Class</u>	<u>Failures</u>	<u>%</u>	<u>No. in Class</u>	<u>Failures</u>	<u>%</u>
1st Yr. Agr.	50	7	14	72	21	29.1
2nd Yr. Agr.	50	19	38	50	11	22
1st Yr. Dip.	14	1	7	14	7	50
2nd Yr. Dip.	20	0	0	13	0	0
1st Yr. H.Ec.	30	6	20	36	7	19.4
2nd Yr. H.Ec.	31	3	9.6	21	2	1

Note: Failures in this table mean numbers of people with a weighted average of below 50%. The high percentage of failures of the 1st year Diploma students this year is due to the large number of foreigners (56%) who are now having special English classes. The registrar, Mr. Walsh, reports that those students repeating their year are doing well on the whole.

### SCHEDULE OF I.V.C.F. MEETINGS FOR FEBRUARY

6th	Rev. Merritt of Strathmore
13th	Dr. Stanford Reid of McGill
20th	Mr. J.I. Duguid F. R. G. S. of Montreal
27th	Mr. Goodie Campbell of Macdonald College
Each Sunday 6 - 6.30 P.M. Hymn Sing in Stewart Room	

Above is an architect's suggestion for an extension to the campus, that might materialize by the year 2000 A.D. It consists of three new Women's Residences and a proposed Union Building with kitchen and Dining Room.

#### CONCRETE LAID FOR 2ND WOMEN'S RESIDENCE

Those attempting to study on the upper campus will not need to be reminded that work is in progress. In fact the foundations are being laid. The architect is Mr. Hugh Blachford, M.R.A.I.C. (of Wood, Blachford, Ship, Associated Architects), who received his B.A. from McGill in 1937. (It is interesting to note that the original Campbell Wood of this firm was responsible for the erection of Macdonald College). The College representative on the building site is Mr. G. Wright, Assistant Superintendent of Buildings and Grounds.

The new building is to be "T" shaped, such that the top of the "T" runs parallel with the main corridors of the other residences. From the vestibule, one should obtain a view of the lower campus through the centre of the Arctic Circle. In the entrance lobby the mail boxes should be noticed, and under the stairs, 2 of the 4 telephone booths on each floor. Turning west one sees the Date Room. This is in 5 parts, each having chairs and a divan, separated by partitions 5 feet high. Beyond this is a Card Room which can become part of the housekeeper's living quarters if necessary. In the other direction there are the TV, Record and Music Rooms. The latter can be joined to the Recreation Room at the end by opening wide folding doors. A kitchen is placed for serving both a Club Room and Recreation Room.

The building plan in operation calls for a residence to accommodate 202 girls (82 double rooms, 38 single) to be completed next September with projected accommodation for 100 girls to be added at a future date. No bedroom faces north and the architect considers that all have an interesting view. They each have a desk, bed, vanity, cupboard, mirror, shelves and pin-up board per girl. The second and third floors each have a lounge and balcony facing west.

### NEW INFIRMARY

Have you looked underneath the wood and tarpaulin structure on the northern end of the Women's Residence? Your reporter apologizes for telling the architect, Mr. Blachford, that it looked very ordinary without realizing that the New Infirmary was a very different shape inside it. All the walls are now standing. The new building is connected to the basement of the Women's Residence, from which one may go upstairs without entering the Infirmary. This is because the second floor consists

## Tale of Two Cities!

Among Western Hemisphere cities with the largest per capita enjoyment of Coca-Cola are, interestingly enough, sunny New Orleans and chilly Montreal. When we say, "Thirst Knows No Season," we've said a cheerful mouthful.

So don't take any lame excuses about its not being hot enough for Coke. Forget the temperature and drink up!

**SIGN OF GOOD TASTE**

A call for "Coke" is a call for "Coca-Cola". Both trade-marks identify the same refreshing beverage—the product of Coca-Cola Ltd.

Ad No. 7584

The Agronomy Department is taking part in the preparations for the 10th International Genetics Conference to take place at McGill in August.

\* \* \*

Next year first term examinations will again be held after Christmas; in fact Jan. 5-10, 1959. A.D.M.

\* \* \*

This year the three contestants for the Macdonald Carnival Queen were chosen by a committee of staff and students from the thirteen nominees. This is different to previous years, where the choice of Queen to all intents and purposes took the form of a Class Competition. The Carnival this year covers four days instead of three and for the first time includes a Curling Bonspiel. The Ski trip has been cancelled due to an apparent lack of interest. H.M.

\* \* \*

There are now 99 car owners at Macdonald. Who is going to be the 100th?

A Blood Donor's Clinic will be held Tuesday, February 11, starting at 9.30 a.m. The goal is again 300 pints. All students over 18 years are eligible as donors. The clinic will be in the Women's Gym. P.A.

\* \* \*

The first week in March will be "Dutch Week". This new idea for Mac means that gal and guy each pay their own way. B.A.

\* \* \*

In January and May of every year, the Provincial Government grants Quebec students registered in Agriculture fifteen dollars per month. Agriculture students from elsewhere receive half this amount.

The college cashier mailed the list of recipients a fortnight ago, and expects to have the money by the time you read this.

P.W.

\* \* \*

Those who stayed here during the Christmas vacation will have followed the progress of ladders around the library and watched in awe the "new look" that gradually appeared.

This has been accomplished by setting luminous panels in alternate bays on the ceiling, an arrangement never before attempted by the contractor.

The tables have lost their individual lamps, and a new air of spaciousness and dignity has been acquired.

R.A.

### JOURNEY INTO SPACE

I had eighteen bottles of whiskey in my cellar and was told by my wife to empty the contents of each and every bottle down the sink, or else...I said I would, and proceeded with the unpleasant task. I withdrew the cork from the first bottle and poured the contents down the sink with the exception of one glass which I drank. I extracted the cork from the second bottle and did likewise with the exception of one glass, which I drank. I then withdrew the cork from the third bottle and poured the whiskey down the sink which I drank. I pulled the cork from the fourth bottle down the sink and poured the bottle down the glass, which I drank. I cork of the next and drank pulled the bottle from the one sink out of it, and threw the rest down the glass. I pulled the sink out of the next glass and poured the cork down the bottle. Then I corked the sink with the glass, bottled the drink and drank the pour. When I had everything emptied, I steadied the house with one hand, counted the glasses, corks, bottles and sinks with the other which were 29, and as the house came by I counted them again and finally had all the houses in one bottle, which I drank. I'm not under the affluence of incohol as some tinkle peep I am. I'm not half as thunk as you might drink. I feel so foolish I don't know who is me, and the drunker I stand here the longer I get. Oh me!!!.

### ANSWER THIS

To a 40 oz. bottle of rum is added one oz. from a 40 oz. bottle of water. Then after mixing well, one oz. of the water-rum solution is added to the bottle of water. Does the rum bottle contain more water than the water bottle contain rum?

(Answer on page 14)

### MACDONALD COLLEGE ROYAL

This year the Macdonald College Royal is planning to have a hobby competition open to students of all faculties. Hobbies of every description will be accepted.

Application forms in Foyer and Main Building.

## MODEL DEBATE

On January 22nd the Interclass Debating Season was opened by a Model Debate with two McGill students speaking for the government. George Beckford was speaker. The topic: "It is resolved that there is culture in agriculture".

Les Malcovitch, a second year engineer, was the best speaker in the debate. He stood on his own two feet, throwing his voice with ease to the back of the hall. Roger Otley, opposing, gripped the paper stand firmly with both hands, exercising its feet and his own simultaneously. He was hesitant, losing his train of thought occasionally. Culture he claimed is the intellectual side of civilization, while agriculture is an applied science. Quoting John Cowper Powis: "Culture is all that is left after you have forgotten everything you set out to learn".

J.J. Elkim assured himself by putting one hand in his pocket and using the other for expression. He prematurely summed up the arguments for the government which were threefold, that CULTURE appears in the spelling of AGRICULTURE, that culture means tillage, which is agriculture, and that culture comes from nature with which the farmer is best associated.

Ron Roberts second speaker for the opposition held the paper stand like his partner, but bending his arms, moved his body backwards and forwards instead.

While the debate was open to the House the Bible was of course quoted. The House passed the motion and Professor Hawkins, Chairman of the judges, announced their concurrence.

J.K.

## STUDENTS' COUNCIL MEETING

The eighteenth meeting of the Students' Council this session was held Tuesday, Jan. 21.

It was learned that a P.A. system will be installed on trial in the Foyer and Stewart Room. This system is for the students advertising. It was decided that three council members would be responsible for granting permission to use this system.

The matter of the nutrition of fourth year students came up in regard to the experiment carried out by the Nutrition Dept. Apparently 44 fourth year men and women are being nourished on green biscuits, black tea, black coffee, and water for a week. The people involved include hockey players, (intercollegiate), practice teachers, and people who by virtue of their state of health, are not supposed to be on a diet of any kind. This experiment is termed a voluntary experiment with no alternative. An inquiry into this despicable state of affairs is to be held.

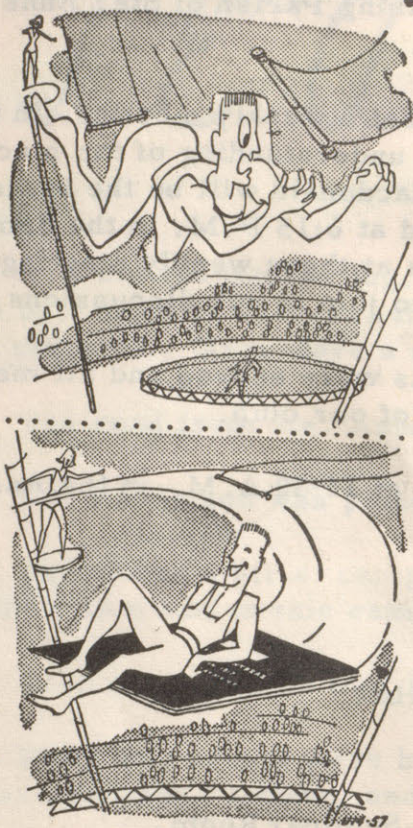

The meeting adjourned after approximately an hour's deliberation.

P.A.

The Newman Club at a special meeting Thursday, January 23rd, welcomed Father Macdonald, the pastor of the new English-speaking Parish of Ste. Anne de Bellevue and chaplain of the Macdonald Newman Club.

It was the general conviction of all members that a weekly meeting, in the form of a study or discussion group, would help in a better understanding of the place and role of the Catholic student on the campus. Father Macdonald will be the leader of these Thursday afternoon meetings, which will be held at 6:15 P.M. in the Seminar Room. Not only would we like to see all our members at these weekly meetings, but they are open to students of all faiths who would like to join in our discussions.

After the meeting was adjourned, refreshments were served and all members had an excellent opportunity to meet the new chaplain of our club.

Father Macdonald will say mass every Sunday at 11:30 A.M. in the Assembly Hall.

#### Coming Events:

Every Sunday morning

Mass at 11:30 A.M. in the Assembly Hall.

Every Thursday evening

Discussion period at 6:15 P.M. in the Seminar Room.

Everyone is welcome.

#### DRAMA CLUB

On Wednesday, Jan. 22, the Drama Club presented their play, "The Running Tide" by Joy Reid Gould. Parts were exceptionally well cast and all attending enjoyed the play to the fullest extent.

The play, ably directed by Tryphena Flood, was scheduled to advance to Hamilton for the Intervarsity Drama Festival on January 30th. Other Universities competing are Western, University of Toronto, Bishop's, McMaster, and Carleton. The trip has been financed by the Students' Council assisted by money gained from a dance sponsored by the Drama Club. To the Director and her talented cast goes every wish for continued success.

#### ENTOMOLOGY DEPARTMENT

The Department of Entomology is awaiting the arrival in early March of a new chairman in the person of Dr. D.K. Kevan. He comes to Macdonald College from England where he was head of the department of Zoology at the University of Nottingham. He has published a number of papers, his chief interest being in the taxonomy of grasshoppers and their relatives. He has recently edited a book on soil insects.

Dr. Bigelow has been actively studying the relationships of field crickets as they occur here and below the Mason-Dixon line. His latest prodigy is a hybrid that trills in a cross between the patois as spoken in the best circles of Canadian crickets and the accents of the deep south.

(The contamination is the same.)

# FEATURES

## 50 YEARS AGO

It is always interesting, informative and often amusing to look back on days gone by. Back in 1910-11, the year the first volume of the Macdonald College Magazine came out, these were a few of the things going on:-

The road from Ste. Anne's to Montreal was dirt.

Dr. Robertson was principal of the college.

There was a girls' campus, where "Diaper Dell" is now situated, and a skating rink was made on this campus in wintertime.

Each class had its own Literary and Debating Society.

Field Day events were held on the oval in front of the Main Building. Ross was the best all-round athlete, and the Freshmen were the champions of the day.

The dining hall tables sported white cloths.

In the college kitchen, breakfast porridge was made during the night in a Cereal Steamer. Steam heat, in fact, was used for both the cooking of food and the heating of utensils.

An article in the Household Science section of the magazine contained a comment by a Professor C.L. Norton (not of the college staff) to the effect that a cast iron stove was "monstrous", and "something in the nature of a fireless cooker, worked by an electrical device would in the near future supersede the present cook stove".

The girls of the college went on moonlight walks (with their Outdoor Athletics Manager) and even snow shod!

There was a baseball team, which, when the edition came out, had played one game - and lost it.

The college football team was composed of twelve students, and the team stood third (when the edition went to press) in a League composed of Presbyterian College, McGill, Diocesan College and Wesleyan College.

The college had an orchestra.

On January 29th., Dr. Brittain gave a lecture on "Our Native Birds", - the first of a series of lectures including one on "Wireless Telegraphy" by Dr. C.J. Lynde.

Many students spent the Christams holidays in residence. During this time they amused themselves by snow-shoeing, sleigh riding, "playing games and dancing". They even had a contest for the boys—dressing dolls and trimming hats!

The Seniors' class yell was:

We were the first  
We are the first  
The first we'll always be  
One-nine-one-one M.A.C.

The Mac student teachers went off to practice teaching in Montreal by train, and "the only carriage afforded was one for the lunch boxes".

A masquerade ball was held in the Men's Gym on February 24th, at which the students tripped the light fantastic in the form of a Grand March, waltz, two step and gavotte!

Girls were initiated by having their hands dipped in salt water, then being locked in the Assembly Hall. As one sweet young thing wrote, "Here we awaited the pleasure of our seniors, who came at length and marched us across the campus to our building, where refreshments awaited us, to which we did full justice after our strenuous and nerve-racking experience".

E.B.

### DO YOU HATE YOUR ROOMMATE?

Some of us live from day to day never realizing how much we actually hate our roommates. If you've been labouring under the misapprehension that you and your cell mate are perfectly happy all year, here is a little something to prove that you really detest the occupant of that "messy side of the room".

It's 7:30 in the morning and you've just shut off your alarm so you can sleep through the first lecture. You close your eyes and are just drifting off when his alarm goes off. This is no ordinary alarm clock. The windows rattle, the door shakes, a glass shatters on the shelf and you leap out of bed screaming. He casually reaches over and silences the little ticker. You feel like shutting it up permanently, but you restrain yourself.

"Dandy little alarm", he says. After he gets the window wide open to air the room at 30 below, on goes the radio and the entire hall can hear "Wake up Little Susie". He puts on a pair of your socks, and so the day starts happily.

Breakfast isn't too bad except that he spills milk in your lap. But you don't mind, it could happen to anyone. When you get to your lecture you discover that he forgot to hand in your lab book and the Professor wants to see you after the class.

He borrows your car at lunch hour and comes back walking. You cross your fingers and pray that it's only stalled or stuck in the snow, but really, down deep you know the old machine is piled up somewhere. He tosses you the keys and asks nonchalantly how much insurance you carry. You fowl up your lab in the afternoon worrying about the guy who's suing you.

That evening, you decide to do a little studying and get your books spread out on the desk. You're halfway through a problem when he walks in with five cohorts. They sit down all over the room (two of them on your desk) and start a good old college song. After an hour or so they leave for more congenial surroundings and he asks you why you're so glum looking. You tell him sweetly that it's been a hard day.

When you finally get your roommate to bed, he sings himself to sleep. Then you sneak over and, picking up a long pair of scissors, you -----.

Look around, Dear Reader, is your roommate looking strangely at you?

MURRAY LAMB.

### ADULT EDUCATION SERVICE

The Adult Education Service of Macdonald College carries out a ~~fine service~~ of education through its varied extension program. The different advantages available are not confined entirely to schools, but clubs and groups of adults also make use of the services offered.

The center distributes English films from the National Film Board to schools, and makes them available to clubs and other groups. These are non-theatrical movies on educational subjects of interest to many people. Among the topics currently "on film" in the film library are music, sports, creative arts, and health. Catalogues of the 600 titles are distributed to schools so that teachers know exactly what is available. All topics are Canadian.

At the Information Center there are countless booklets and pamphlets dealing with such subjects as Agriculture and Public Relations, handicrafts, economic and rural problems. These can be borrowed by such groups as Farm Forums. Pamphlets are also sent out for display purposes. These fall into two categories - some are borrowed, others are purchased.

Many books on leadership are available through the Adult Education Office. This proves useful to people setting up groups such as "young peoples" or community activities. There are many child study groups being supplied with material through the office.

The main phase of work of the Adult Education Office is extension work and public service. It conducts evening courses in landscaping, sewing, French and swimming to name only a few. Community schools at Ormstown, Huntington, Cowansville, Knowlton, Waterloo and Stanstead are sponsored by Community groups.

"Laquemac" is a summer school run by the Adult Education Service in collaboration with Laval University in Quebec. Macdonald is the headquarters for Adult Education in Quebec, serving all the English speaking communities.

Miss Clynes has an enormous job as head of the McLennan Travelling Library, which serves the English speaking residents of Quebec. The Bookmobile

vels through the Eastern townships and the Chateaugay valley on six week  
chedules distributing books to schools, village libraries, rural groups and individual  
members. At present the annual circulation is 34,000 and considering the fact that  
each book is read an average of five times, this makes a total of 170,000 book readers.

In addition, books are shipped by freight to the far northern points in the  
province, north of the St. Lawrence, as far as Noranda in the west and Sept Isles  
to the east. Some individual members are served by mail. All this circulation of  
reading material goes on from the nucleus of the service here at "Mac".

This Travelling Library is a great help to teachers who, in this present day  
when schools are over-crowded, cannot find time to give to gifted students. Such  
students read widely and this contributes greatly to their education.

Mr. R. Cornish is in charge of the Multilith Dept. Here most of the typing  
of different college departments is done. Some art work such as letter heads, and  
church programs, is also done here.

Buddy Hughes the Agriculture Field man heads an extension service which  
works at helping the farmers of Quebec. The basis is to maintain contact between the  
Agriculture Faculty of Macdonald and provincial Agronomes. The extension work  
falls under the jurisdiction of the government's Dept. of Agriculture. There are  
panel discussions on such topics as silage and many short courses for farmers  
are held in different communities. More and more experimental work is being done  
away from the college through this extension service. In the spring, fertility experi-  
ments will be made on fertilizers and soils. These will be carried out on the farms  
and some one will oversee the experiment to make sure that everything is prepared  
and planted in the right manner.

The Handicrafts division is also administered to by the Adult Education  
service. Miss Frances Wren is the chief instructor. There are courses in wood  
working, metal and leather work and weaving. The women who like these courses  
either work in Red Cross Hospitals or as Occupational Therapists.

Classes are also held in the evening and the Homemakers, 3rd year Home  
economics students and Kindergarten teachers all get an elementary course in  
sewing under the direction of Miss Niejzen sometime during the year.

All these different departments come under the jurisdiction of the Adult  
Education service of McGill University. Prof. Avison is the head of the whole  
department. From the offices tucked away under Stewart Hall pour forth a great  
many services which are very beneficial to many English speaking people of Quebec.  
This is just one example of the work done by Adult Education all over Canada.  
It is a fine organization, and we, the students of Mac, salute it.

J.F.

'DD' M.

# Sports

## INTERCOLLEGIATE BASKETBALL

Since Christmas the Macdonald Intercollegiate Basketball team has continued its winning streak and now has won six straight games.

In an exhibition game against the DELTA SIGMA PHI Fraternity, the Macdonald team showed that the long layoff during the Christmas Holidays, and examination time had not cut down their ability to win. They defeated the boys from McGill by a score of 52-48.

Although guarded quite closely, Carrier, once again, was high scorer with 25 points. Sutherland, who played an outstanding defensive game, rebounding quite well, came off with the second highest scorer spot making 13 points. The other outstanding Macdonald player was Killens with good defensive and play making manoeuvres.

McKinnon of McGill scored 16 points with his deadly long shots. Miller was second with 12 points.

On Friday the 25th, the Macdonald team visited C.M.R. Although Macdonald played a very poor first half as shown by a score of 24-23 for the Green and Gold team, they rallied in the second half, led by Brian Carrier's accurate shooting. Lambert was second high scorer with 17 points and Sutherland had 14 points as compared to Carrier's 19. The main reason for Macdonald surging ahead to a victory of 60 points to 41 seemed due to swift breaking and good defensive work.

Macdonald scored the majority points at close range whereas C.M.R. were forced to resort to long shots.

Hudon for C.M.R. came up with 19 points to match Carrier, but his percentage was 33.3 whereas Carrier's was 34.6%, Lambert and Sutherland each shot for 40%.

As a whole the Macdonald team shot 77 times for a percentage of 35.7 whereas the cadets had only 19.6%.

Macdonald's team is top choice for the coveted Championship trophy since they have only four league games to play, all with teams they have previously defeated.

It has been suggested that the reason for Macdonald's rise is due to increased spirit and team work, which was sorely lacking last year. So let's all go out and cheer a spirited team to victory at the forthcoming basketball games!

## HOCKEY

Although Mac started off the New Year with 3 defeats, the team is improving and the scores are not always indicative of the play. Mac's trouble seems to be that they run out of steam in the third period. This is caused by a lack of depth in the team. Given more time, however, we hope this condition will be met.

Special mention should be made of Howie Goodby, the Aggie net-minder, for considering the shots on goal he has been playing a great game.

Last Friday at C.M.R. one of Macdonald's outstanding athletes, Dave Mowatt was badly injured in the face fighting for the puck in the corner. He is now in Montreal General Hospital undergoing surgery. It is hoped that he will be out next week. On behalf of the student body we wish Dave a speedy and successful recovery.

### LAKESIDE 8 - MAC 4

On December 17 the Aggies played the Lakeshore Junior B team on home ice, and lost a hard fought battle. Mac scoring was as follows: Cullen - ass't Beeler, Boswell - ass't Mowatt, Burnside - ass't Taylor and Beeler unassisted.

### BISHOPS DOWN MAC 7-2

Jan. 18 saw Mac playing host to our arch-rivals Bishops and the Gaitors rolled to victory. Bishops scored 3 times unassisted in the first period-goals were credited to Jolly, Macdonald and Reibmayer. In the second period Mac put on a drive and almost closed the gap with goals by Cullen (ass't Beeler) and Beeler (ass't McCleary). However the effort proved too much and Bishops scored again through Reibmayer. In the 3rd period Bishops poured it on as Mac fizzed out. Jones and Reibmayer both unassisted together with Jolly (ass't Jones) scored for purple and white. Mac had 7 penalties to Bishops 3.

### C.M.R. 7, MAC 5

Once again the hard fighting cadets downed the Aggies in a bitterly fought contest. At half time Mac had a 5 to 2 edge, but with the injury of Mowatt, Macdonald came apart at the seams. the final period saw C. M. R. net 5 to win the game. Mowatt, McCleary, Beeler and Cullen played outstanding games. Freshman Austin Carpenter was badly bruised. Scoring for Mac were Beeler (ass't Mowatt), Mowatt (ass't Beeler), Beeler (ass't Cullen), McCleary (ass't Beeler and Cullen) and Mowatt (ass't Cullen). C.M.R. statistics are not available.

### SIR GEORGE SWEEPS MAC 8-1

On Saturday night the bruised and reorganized Aggies dropped a game 8-1 to Sir George Williams on foreign ice. Mac's lone scorer was John Day (ass't Beeler and Cullen).
